

Power to the CISO

Cyber Observer is holistic **cybersecurity management** and **awareness solution**. It continuously measures the cybersecurity status of an organization's security environment by retrieving and analyzing Critical Security Controls (CSCs) from relevant security tools.

The comprehensive information **empowers CISOs and executives** to make insightful and timely decisions to ensure the cybersecurity of the organization.

Compliance standards met by out-of-the-box and customizable security controls

Dozens of out-of-the-box tools

'This technology provides great insight into the often-obscure subject of security program performance. For organizations struggling to understand the value and impact of investing in security technologies, Cyber Observer provides both direct and relevant feedback. The insights it offers can help an organization transition to a truly proactive security program.*'

Developed for CISOs, Infosec and IT managers, Cyber Observer provides extensive cybersecurity understanding for all stakeholders. By connecting to the security and related third-party vendor tool suite, Cyber Observer provides insights and recommendations to empower effective enterprise cyber defense.

***SC Media**

Empowered with **comprehensive awareness**, you can easily identify weaknesses, reduce mean time to detect, prevent breaches, drive strategic planning and report to executive stakeholders. These activities continually improve enterprise **security posture** and **maturity**.

Four Layers of CyberObserver

Organizations fortify themselves with an abundance of security technologies then may struggle to determine the enterprise level of cybersecurity achieved. CyberObserver delivers a single-pane-of-glass solution displaying performance data that proactively provides improvement recommendations in near real-time. This single view of enterprise-wide cybersecurity allows the organization to deliver the level of security required, meeting both compliance and business risk needs.

Did you know?

'80% of the problem can be solved by getting the cyber hygiene correct, rather than chasing the latest advanced technology'.*

Research Note on RSA 2019**

Tools:

Based on manufacturers best practices and industry recommendations, CyberObserver provides internal scoring on your current Security Tools configurations and presents the optimization status of your tools.

Security Views:

Based on industry-recognized frameworks and Critical Security Controls (CSCs) CyberObserver provides near real-time assessment of all your security domains and recommendations to improve.

Coverage:

Based on a given industry framework, CyberObserver provides an on-going cybersecurity program, gap analysis, and risk mitigation management to enhance your security environment.

Behavior:

Leveraging near-real time monitoring of security tools and domains, CyberObserver's core engine provides continuous analytics and alerts in case of deviation from normal behavior.
